

Creation in Genesis is Consistent with God's Power

IRREDUCIBLE COMPLEXITY

THE BOMBARDIER BEETLE

"Cain was in the first generation of children ever born. He (as well as his brothers and sisters) would have received virtually no imperfect genes from Adam or Eve, since the effects of sin and the Curse would have been minimal to start with. In that situation, brother and sister could have married (provided it was one man for one woman - which is what marriage is all about [Matthew 19:4-6]) without any potential to produce deformed offspring."

Dinosaurs are used more than almost anything else to indoctrinate children and adults in the idea of millions of years of earth history. However, the Bible gives us a framework for explaining dinosaurs in terms of thousands of years of history, including the mystery of when they lived and what happened to them. Two key texts are Genesis 1:24-25 and Job 40:15-24.

DISMANTLING THE HIGH PLACES

Jesus' Teaching on Biology

In the beginning was the Word, and the Word was with God, and the Word was God. The same was in the beginning with God. All things were made by him; and without him was not any thing made that was made. John 1v1-3

the LORD God formed the man from the dust of the ground and breathed into his nostrils the breath of life, and the man became a living being. Genesis 2v7

but you must not eat from the tree of the knowledge of good and evil, for when you eat of it you will surely die." Genesis 2v17

"By the sweat of your brow you will eat your food until you return to the ground, since from it you were taken; for dust you are and to dust you will return." he must not be allowed to reach out his hand and take also from the tree of life and eat, and live for ever." He placed on the east side of the Garden of Eden cherubim and a flaming sword flashing back and forth to guard the way to the tree of life. Genesis 3v19,22,24.

Haven't you read," he replied, "that at the beginning the Creator 'made them male and female', and said, 'For this reason a man will leave his father and mother and be united to his wife, and the two will become one flesh' Matthew 19v4,5

It may come as a surprise to most people, but Darwin did not discover natural selection. A creationist, Edward Blyth, discussed the idea 24 years before Darwin published Origin of Species. Although he did not use the term, Blyth rightly understood that natural selection is a conservative process, allowing the created kinds to adapt to changing environments, food supplies, etc., but not changing one kind into a different kind. Further research has demonstrated that natural selection can only act upon genetic information already present. It can never add any new information. But Darwinian evolution would require that organisms somehow gain new (previously non-existent) genetic information (new instructions in their DNA) in order to evolve from single-celled organisms to people. Overall, natural selection results in a net loss of information; it goes in the "wrong direction." <http://www.answersingenesis.org/articles/oect/defense-local-flood>

The offence caused to God by humans ignoring the teaching of Jesus in Genesis

Scripture condemns the **method** of evolutionary ideas of creation.

For although they knew God, they neither glorified him as God nor gave thanks to him. Instead, their thoughts turned to worthless things, and their senseless hearts were darkened they became fools refused to give thanks to the Creator and became vain in their reasonings ... their senseless heart was darkened and they exchanged the glory of the immortal God, shaping their idea of God's creation and power and methods based on what they observed of things that died ie humans, birds, and of four footed creatures, and of reptiles.

Romans 1v21-23 (expanded)

The Results: God is attributed with creating by an unjust cruel method ie cancers, bloodshed, survival of the fittest

"Now when a Christian believes that the death, bloodshed, disease, suffering and violence in the fossil record represents millions of years of history as God 'created', then what did sin do to the world? What did the Curse do? Why does death have anything to do with sin? Why does God describe this as very good? Does this mean that violence and disease are 'good' in God's eyes? Is it any wonder young people today have no sense of sin and the holiness of God?"

Why Won't they Listen? Ken Ham p84

Jaques Monod evolutionist and atheist said, "selection is the blindest, and most cruel way of evolving new species and more and more complex and refined organisms, .. the more cruel because it is a process of elimination, of destruction. The struggle for life and the elimination of the weakest is a horrible process, against which our whole modern ethic revolts. An ideal society is a non-selective society, it is one where the weak are protected; which is exactly the reverse of the natural law. I am surprised that a Christian would defend the idea that this is the process which God more or less set up in order to have evolution."
