

Warning

Problems with God's people understanding the nature of the God to whom they had allegiance is not new.

The Lord God Almighty warned the people of Israel through Moses of the pitfalls that awaited them as they entered the promised land.

In Deuteronomy 4 God detailed that assimilating the method of the foreign nations they were to conquer in matters of Biology and Cosmology was especially dangerous.

If they didn't stick with God's word on these matters they would end up in IDOLATRY. That is taking up ideas in these areas which contradicted what God had already revealed.
